

With me in the team, the Health pillar cannot fall below 1.

Chef

My team can choose to pick two puzzle pieces instead of one. This ability can only be used once.

Coastal Shellfish Farmer

My team places their pawn at the top of the Biodiversity pillar to start the game.

Marine Ecologist & Climate Researcher

My team can choose to skip one Tide Turn card during the game. This ability can only be used once.

Deep-Sea Fisher

Importance
I help bring good, responsibly caught seafood to people and use my skills to help others make smart, healthy choices.

Daily tasks
I create menus with local, sustainable seafood, teach people about their food, and work with fishers, farmers, and staff to make good choices.

Challenges
I find it hard to always find a supply of sustainable seafood, keep prices fair, and help customers make better choices in a busy, fast-food world

Importance
I produce shellfish responsibly to feed people with healthy products and help protect wild species from being overfished.

Daily tasks
I grow oysters and mussels, check the water to keep them healthy, ship fresh shellfish to stores and restaurants, and teach others why farming seafood responsibly is important.

Challenges
I have a hard time with pollution and warming waters that hurts shellfish, high costs and big farm competition, and getting people to trust farmed seafood.

Importance
I connect scientists, businesses, and leaders to protect marine life and keep oceans healthy.

Daily tasks
I study how climate change affects marine life, help set safe fishing quotas, work with leaders on policies related to the ocean, and team up with fishers to protect the sea.

Challenges
I find it tough to get leaders to take scientific data into consideration, find money for important research, and fight misinformation about climate change and fishing.

Importance
I speak for fishers who catch species deep in the ocean trying to make money while protecting marine life.

Daily tasks
I spend weeks at sea catching seafood very deep in the water, apply fishing rules including on my choice of fishing gear, work with inspectors, and protect marine life while earning a living.

Challenges
I'm under pressure to catch more fish, deal with fish moving and endure worsening weather due to climate change. Not to mention my job is dangerous and physically demanding.

Importance
I help move seafood quickly from the docks to stores while keeping it fresh and good, stopping waste and spoilage.

Daily tasks
I deliver fresh and frozen seafood in special trucks that keep it cold, make sure it arrives on time, and follow the rules to run smoothly.

Challenges
I face higher fuel costs, vehicle problems, and bad weather that can delay deliveries, plus it's hard to keep things cold during long trips.

Importance
I make sure only the best seafood gets sold and that nothing goes to waste, keeping products fresh and helping fishermen earn a good living.

Daily tasks
I check seafood to make sure it's fresh and the right size, keep records to track where it came from, sort it for different buyers, and make sure nothing goes to waste.

Challenges
I struggle with fish quality changing because of the environment, not having enough cold storage, quick deadlines to keep fish fresh, and always needing to follow rules carefully.

Importance
I fish responsibly to protect ocean life and give fresh seafood to people, balancing making a living with keeping the ocean healthy.

Daily tasks
I fish away from the coast every day, using responsible fishing practices, I follow the rules to protect fish stocks, keep my catch fresh, and team up with others to support fair and responsible fishing.

Challenges
I struggle with unpredictable weather caused by climate change, compete with big fishing companies, deal with changing seafood prices, and worry about illegal fishing.

Importance
I work to stop illegal fishing and help protect the ocean and honest fishermen.

Daily tasks
I check fishing boats, track illegal fishing activities, inform fishermen about fishing rules, and make sure laws are respected.

Challenges
I have to deal with illegal fishermen who don't follow the rules, limited help to stop them, and finding a fair balance between rules and small fishermen's needs.

Once in the game, the team can take one point from one pillar and move it to another one.

Seafood Transporter

In my presence, the team places their pawn at the top of the Health pillar to start the game.

Dockside Grader

For all cards announcing -2 points on Biodiversity, it becomes -1.

Offshore Fisher

For all cards announcing -2 points on Social Fairness, it becomes -1.

Fisheries Inspector

Importance
I help customers find fresh, good seafood and teach them how to choose options that are good for the ocean.

Daily tasks
I get seafood from trusted sellers, keep it fresh and ready to sell, help customers pick good products, and teach them about sustainable choices and cooking tips.

Challenges
I compete with cheap, mass-produced seafood, deal with mislabelling, and struggle to keep seafood fresh because it doesn't last long.

Importance
I help connect fishers, processors, and stores so that fresh, good seafood gets to customers quickly.

Daily tasks
I buy seafood in large amounts, agree on prices with sellers, keep track of stock, and watch market trends to buy smartly and fairly.

Challenges
I face unstable prices, tough competition from big distributors, and supply problems caused by environmental changes or global trade rules.

Importance
I turn fresh seafood into easy-to-eat foods like frozen meals, smoked fish, and canned seafood to make it more convenient for people.

Daily tasks
I make sure seafood is safe and ready for stores, create new products like pre-marinated fish, and use smart packaging to keep it fresh longer.

Challenges
I deal with changing customer tastes, strict hygiene rules, expensive tech upgrades, and the challenge of being both eco-friendly and cost-effective.

Importance
I make sure fresh seafood is handled safely and prepared quickly so it doesn't spoil, helping to stop waste and save money.

Daily tasks
I clean, cut, fillet, wash and pack seafood safely, follow strict hygiene rules, and find ways to use leftovers so nothing goes to waste.

Challenges
I deal with staff shortage, expensive energy to for refrigeration, and pressure to meet growing demand while keeping food safe and high quality.

My team can pick two puzzle pieces before starting the game.

Seafood Retailers

For all cards announcing -2 points on Economics, it becomes -1.

Seafood Wholesaler

My team can choose to skip one Quest Card during the game. This ability can only be used once.

Secondary Processor

For all cards announcing -2 or -1 on Health, it becomes 0.

Primary Processor

Importance
I choose responsible seafood and help the industry by supporting fishers and sellers who do the right thing.

Daily tasks
I care about where seafood comes from, pick eco-friendly options, try new seafood recipes, and teach my community about making smart seafood choices.

Challenges
I find seafood labels confusing, try to save money while choosing sustainable options, don't always know how to avoid waste and sometimes can't find responsibly sourced seafood nearby.
